<b>114+</b>		SololoRamata-2	Need shelter	They don't have shelter
<b>115</b>		Mado Adhi	Their shelter semi permanent but need wall plast both inside and outside.and latrine	

**Note:**

All the requests and needs taking part of what had been promised by us to the donors who are supporting the children through distance adoptions and corresponds to a minimum of decorum, have to be respected for each child, also for those minors up to now without a donor and therefore "sponsored" by Sololo Project.

When a family or a minor is admitted to the Project it is **necessary to supply what is needed to have a complete "basic Kit family" as per attached list and "all the services for the persons activated"**.

**NEW HOUSES**

- Building new shelters on land belonging to different persons means, by Kenyan law, to offer a house to the owner of that land and not to whom is living in the house
- Repairing or rebuilding on the same place means exposing the house to the same risks as before in case of another flood calamity
- The quotation of building simple houses with three rooms and mabati roof exceeds our economical possibilities to satisfy all the families in need of.

**Suggestions:**

- 1- Evaluation of the possibility of the community to offer a small plot to each family in need of a shelter; or the authorities to assign an area where to build a new manyatta to accommodate the families in need, may be next to the Obbitu-Children Village being the base for assistance.
- 2- Obtaining a quotation for a minimal work of wire and cement which surrounds and closes the broken walls of the shelters and the people providing for the roofing in their traditional way (like it had been done for the small store close to the generator house).
- 3- Evaluation of the possibility to pay a rent for an acceptable temporary accommodation for the most desperate.
